

SYSTEM CONSTELLATIONS IN ORGANIZATIONS

a precision tool for coaching, consulting, management and more

Advanced Training

*Are you looking for a method that opens up new perspectives for your profession as consultant or manager?
Do you know the method of systemic constellations and want to integrate it into work with organizations?*

What are the benefits of this method?

- An accurate representation of the essential aspects and interdependencies of a problematic situation
- The simulation of alternative solutions
- The possibility to visualize intuitions and to share them with other people
- A way to generate valuable information for important decisions

What you will learn in the training?

- Techniques that enable you to apply the method in organizations directly with the stakeholders
- How to combine Systemic Constellations with other methods and integrated them into development processes
- Various forms of Systemic Constellations you can use in different contexts and for specific topics

What is in it for you?

- You gain much faster a comprehensive understanding of a situation
- You and your clients will grasp the potential solutions not only intellectually, but will also be able to see and experience them emotionally
- You will lead your clients directly to the turning point and increase the likelihood that the developed solution will be implemented

What are the contents of the training?

- Methods - Theories - Techniques
- Fields of application, effects and benefits
- Attitude and beliefs of the consultant
- Consulting context, corporate culture and routines of the client systems

What is the Structure of training and who are the trainers?

- Three integrated modules of 3 days each lead by different trainers with different professional experience and working style:
Georg Senoner (I), Claude Rosselet (CH), Christine Blumenstein-Essen (A) – (about 60 hours)
- Peer groups (about 18 hours)
- Supervision (about 18 hours)
- Manual (English, French or Spanish) and Handouts
